ELECTRICAL DEVICE CONTAINERS: INK JET 30

| **Categories:** [ELECTRICAL DEVICE CONTAINERS](#), [ECO DESIGN](#)

PRODUCT DESCRIPTION

Designer: **Eco Design**

This is a functional metallic container specially designed to collect spent Ink-Jet cartridges.
Its practicality is due to the transparent walls that make it possible to monitor the content and how full it is thereby making the collector's job easier. InkJet 30 is available in two versions: wall, fitted with the relevant slots on the back of the container to fix it to the wall; with ground support with a sturdy pedestal with a contemporary design. Thanks to the many colour schemes available and the careful and attractive design, InkJet 30 becomes a main feature inside the shop selling cartridges and public and private offices.

Dimensions:

Height: **90 cm**
Length: **25 cm**
Depth: **45 cm**
Capacity: **30 lt**

Materials: **steel**
