

BENCHES: EMME SEAT

| Category: [BENCHES](#)

PRODUCT DESCRIPTION

Designer: **Stéphane Chapelet**

Designed by Stéphane Chapelet, EMME SEAT bed has sinuous and elegant shapes but at the same time with a decidedly modern cut.

Also suitable for new urban contexts, in parks, along the seafront, EMME SEAT is produced using the combination of steel for the frame and exotic wood for the internal slats.

Steel is treated with a sandblasting, cataphoresis cycle and finally PP powder coated with the RAL color of your choice. The wood used is Iroko or Okumè, treated with natural water-repellent oils resistant to UV rays.

Dimensions

Height of the seat: **450 mm**

Height: **820 mm**

Length: **700 mm**

Depth: **450 mm**

Materiaux: **steel / wood**
