Designer: **r+p RIGHETTO + PARTNERS**

Dimensions

Height: **790/870 mm**

Length: **680/1180mm**

Depth: **282 mm**

Materials:

Galvanised Steel / Stainless Steel

Characterized by a simple and elegant shape, it can be easily placed in any architectural context, from classic to modern. WAVE STRIP is a very robust and functional product where both electric scooters and bicycles can be parked. Equipped with a particular "half moon" closure, it allows the vehicle to be locked using a common padlock, without having to use the chain (heavy and uncomfortable object).
