

BUS SHELTERS: RHANG

| Category: [BUS SHELTERS / DISPLAY BOARDS](#)

PRODUCT DESCRIPTION

Designer: **Righetto + Partners**

Characterized by a simple and elegant shape, it can be easily inserted in any architectural context, from classic to modern.

Our RHANG shelter is a very robust and functional product where both electric scooters and bicycles can be parked, designed by Righetto and Partners.

RHANG shelter is 3,340 meters long and 2,291 meters high, produced in galvanized steel and subsequently powder-coated in PP with a color chosen from the wide Ral range.

It can be combined with the new WAVE STRIP bike rack, available in modules with two or three stations and customizable in colors. Wave Strip is equipped with a particular "half moon" closure, which allows you to lock the vehicle with a common padlock, without having to use the chain (heavy and uncomfortable object).

Dimensions

Height: **2291 mm**

Length: **3430 mm**

Depth: **1480 mm**

Materials: **steel**
