BENCHES: SARDINA

| Category: BENCHES

PRODUCT DESCRIPTION

Designer: Lab23

Our SARDINA bench is made of HPRC®, a composite, malleable and highly performing material that allows the production of elements of any shape. HPRC® is characterized by a very high mechanical resistance (traction / compression / bending) and by waterproofing, it is highly resistant to shocks and atmospheric agents (salt, smog, ice, sand, etc.). The smooth and at the same time material finish and the very high ability to disperse heat / cold make it a very comfortable material even in extreme climatic situations. An anti-graffiti material and, if necessary, repairable thanks to the repair KIT supplied on request. An ECOLOGICAL material, produced with at least 30% recycled and 100% recyclable material, which meets the minimum environmental criteria (CAM) dictated by current regulations.

Our new SARDINA bench has variable dimensions and is customizable.

Maximum size 18500mm.

Dimensions

Height of the seat: **470 mm**Height: **1025 mm**Length: **18500 mm**Depth: **440 mm**
