PRODUCT DESCRIPTION

Designer: [Bunch Design](#)

The structure of the bench is made of 2 strong feet in steel. On the feet, characterized by carvings in Déco style, 2 exotic wood slats shaping the seat (section: 40x180 mm) and 1 slat (section: 40x240 mm) shaping the backrest are fixed. Each leg is made in steel (60/10 thickness), on which profiles of 60/10 and 30/10 thickness are fixed.

This product is entirely made in Italy from steel subjected to an electrolytic galvanising cycle and subsequently painted with PP powders with Ral colour of your choice.

As an alternative to steel EN10111DD11, the production in corten is also available, on demand. In this case the material is treated with a specific oxidation process.

The wood used is either Iroko or Okume, treated with natural, water-repellent, UV ray resistant oils.

Max dimensions:

Height of the backrest: **748,5 mm**

Height of the seat: **420 mm**

Length: **1500 mm**

Width: **510 mm**

Weight of steel: **19 kg**

Materials: [steel](#), [wood](#)
