

BENCHES: CORAL ROUND

| Categories: [BENCHES](#), [URBAN DESIGN](#)

PRODUCT DESCRIPTION

The bench CORAL ROUND is made in steel (30/10 thickness). All the metal parts characterized by a coral-like texture are welded together through a continuous welding. All the angles of the bench are rounded for the safety of the user. On the lower part of the feet of the bench, an ellipsis-shaped plate (30/10 thick), with a hole of 11 mm diam. for the fixing to the ground through bolts (not provided), is welded. The bench CORAL ROUND is made of 2 semicircle-shaped elements, connected to each other through M6 screws.

Optional: Cylindrical planter made in galvanized steel, 15/10 thickness, polyester powder-coated. The upper border is strengthened by a fold of 15 mm height.

This product is entirely made in Italy from steel subjected to an electrolytic galvanising cycle and subsequently painted with PP powders with Ral colour of your choice.

As an alternative to steel EN10111DD11, the production in corten is also available, on demand. In this case the material is treated with a specific oxidation process.

The galvanized steel used is steel EN10346DX51D+Z and, unless otherwise stated, is not painted.

Max dimensions:

Height backrest: **260 mm**

Height seat: **450 mm**

Diameter: **1500 mm**

Diameter hole: **400 mm**

Width: **530 mm**

Weight: **52 kg** (optional planter not included)

Optional:

Cylindrical planter in galvanised and polyester powder coated steel, thickness 15/10. The upper border is reinforced by a fold 15 mm high.
