

BENCHES: CORAL

| Categories: [BENCHES](#), [URBAN DESIGN](#)

PRODUCT DESCRIPTION

The bench CORAL BENCH is made in steel 30/10 thickness. All the metal parts characterized by a coral-like texture are welded together through a continuous welding. All the angles of the bench are rounded for the safety of the user. On the lower part of the feet of the bench, an ellipsis-shaped plate (30/10 thick), with a hole of 11 mm diam. for the fixing to the ground through bolts (not provided), is welded.

This product is entirely made in Italy from steel subjected to an electrolytic galvanising cycle and subsequently painted with PP powders with Ral colour of your choice.

As an alternative to steel EN10111DD11, the production in corten is also available, on demand. In this case the material is treated with a specific oxidation process.

Max dimensions:

Height backrest and armrests: **710 mm**

Height seat: **450 mm**

Length: **1060 mm**

Width of the seat: **530 mm**

Width backrest and armrests: **30 mm**

Weight: **38 kg**

Material: [steel](#)
