

BENCHES: PLEGADO

| Categories: [BENCHES](#), [URBAN DESIGN](#)

PRODUCT DESCRIPTION

Designer: [Bunch Design](#)

The seat and the backrest of the bench PLEGADO are the result of 2 steel sheets (80/10 thickness), which the plates for the fixing to the ground (50/10 thickness) are welded on. Under the seat, a support of 80/10 thickness is welded. The bench is characterized by a particular, laser-cut texture called NEW YORK. It can be fixed through specific bolts (not provided) to be inserted on 6 holes (15 mm diam).

This product is entirely made in Italy from steel subjected to an electrolytic galvanising cycle and subsequently painted with PP powders with Ral colour of your choice.

As an alternative to steel EN10111DD11, the production in corten is also available, on demand. In this case the material is treated with a specific oxidation process.

Max dimensions:

Height of the seat: **430 mm**
Height with backrest: **741 mm**
Length: **1600 mm**
Width: **400 mm**
Weight: **80 kg**
