PRODUCT DESCRIPTION

Designer: [Dull Eyes](#)

The bench PUNKA C F is made of 3 elements: a bench, a bin, a planter, combined together with M8 screws. The load-bearing structures of the bench, bin and planter are made in steel (40/10 thickness). The elements shaping the structures are welded together through a continuous welding, which is later polished so that the union is not visible. The bin is made in galvanized steel (8/10 thickness), later powder-coated, or in brushed stainless steel AISI 316 (dimensions: 300x300xH695 mm).

Around the opening there is a frame in galvanized steel (8/10 thickness), later powder-coated, or in brushed stainless steel AISI 316. The fixing to the ground takes place through specific bolts (not provided) to be inserted on 6 holes (10 mm diam.)

This product is entirely made in Italy from steel subjected to an electrolytic galvanising cycle and subsequently painted with PP powders with Ral colour of your choice.

The galvanized steel used is steel EN10346DX51D+Z and, unless otherwise stated, is not painted.

Max dimensions:

Height of the seat: **450 mm**
Height of the bin: **750 mm**
Height of the planter: **1050 mm**
Length: **2930 mm**
Width: **500 mm**
Width of the feet: **130 mm**

Weight: **188 kg**
Bin capacity: **50 lt**
Planter capacity: **80 lt**
