

BENCHES: WAVE

| Categories: [BENCHES](#), [URBAN DESIGN](#)

PRODUCT DESCRIPTION

Designer: [Stéphane Chapelet](#)

Inspired by a wave, the bench has a fluid, elegant and innovative shape. L shaped, it is a bench meant for 4 or 5 people, and represents a modular concept since more benches can be placed one next to the other to create a dynamic context, with new structures and spaces.

The WAVE bench can be combined with all our S range benches and is made in hypergranite, a pure and super resistant, stone-like material, developed exclusively by LAB23.

Material: fiber-reinforced material made in polyester resin and marble powders, particularly resistant to wear and atmospheric agents. Scratches and any accidental damages can be repaired with our repair kit, available on demand. Hypergranite is available in many different colours.

Max Dimensions:

Height: **529 mm**
Width: **1231 mm**
Length: **1911 mm**

Material: [Hypergranite](#)
Available also in the **UHPC** version.
