

CHAIRS: SINGLE WOOD

| Categories: [CHAIRS](#), [URBAN DESIGN](#)

PRODUCT DESCRIPTION

Designer: [Hangar Design Group](#)

The structure of the chair SINGLE WOOD (A) is made in steel, 60/10 thickness. The upper part of the seat and of the backrest is made in exotic wood, 30 mm thick. The backrest and the seat have geometric figures, shaped with a three-dimensional pantograph. The backrest and the seat are fixed to 2 strong elements in steel (60/10 thickness) through specific bolts. On the base of the chair there are 4 holes (11 mm diam.) for the fixing to the ground through specific bolts (not provided).

This product is entirely made in Italy from steel subjected to an electrolytic galvanising cycle and subsequently painted with PP powders with Ral colour of your choice.

The wood used is either Iroko or Okume, treated with natural, water-repellent, UV ray resistant oils.

Max Dimensions:

Height with backrest: **860**
Height of the seat: **450 mm**
Length: **590 mm**
Width: **625 mm**
Weight of steel: **51 kg**
