

COVER CONTAINER: CORAL COVER 120 LT

| Categories: [RECYCLING BINS](#), [URBAN DESIGN](#), [ECO DESIGN](#)

PRODUCT DESCRIPTION

Design and practicality distinguish these waste bin covers. The classic containers of either 120 litres capacity don't make our cities very attractive, therefore LAB23 realized a design product that disguise these containers that are covered and ensured by a door with a universal triangular key lock. The compartment that hosts the container for the recycling of organic waste has a muzzle shaped door that avoids rodents to access it. Customizable product on request.
