PRODUCT DESCRIPTION

Designer: [GIBILLERO Design](#)

Designed and built to complete the “**MOKO**” range, this flower box follows closely the design of the "MOKINO" bin and is characterized by the use of tubular profiles of equal length but of different thickness (20, 40, 80 mm). The profiles are arranged to adapt perfectly to the curved parts of the basket, creating a very soft shape.

On the top and on the basis there are two laser-shaped, galvanized and painted steel plates. Inside there is a squared based vase made of steel foil.

The profiles are painted in the classic RAL colors or in special "rainbow" colors. They are also available in wood with natural finish, iroko or wenge.

Born in sign of respect for the environment, recycling and minimisation of production, MOKO ECO planter consists of a galvanized steel structure to withstand weathering but without further coating processes and vertical rectangular profiles in PVC foam and wood flour, a recycled material, 100% recyclable, flame retardant and resistant to corrosion caused by external agents, certified "Plastica Seconda Vita".

Overall dimensions:

482 x 482 x h 500 mm
