

TREE GRILLES: ALCORQUE 1

| Categories: [TREE GRILLES](#), [URBAN DESIGN](#)

PRODUCT DESCRIPTION

Designer: [Bunch Design](#)

The seat/tree grille ALCORQUE 1 is made in steel, 40/10 thickness. The steel sheets, characterized by a particular laser-cut texture called New York, are welded together through a continuous welding, later polished. The seat is made of 8 elements: 3 seat modules (base + calendered wall + seat) and 5 base modules. These modules can be placed one next to the other to create different combinations. Under the steel seats 2 strong profiles h. 30 mm, shaping the seat, are welded. On the base of the steel elements there are, on each one, 4 holes, 11 mm diam., for the fixing to the ground through specific bolts (not provided).

This product is entirely made in Italy from steel subjected to an electrolytic galvanising cycle and subsequently painted with PP powders with Ral colour of your choice.

As an alternative to steel EN10111DD11, the production in corten is also available, on demand. In this case the material is treated with a specific oxidation process.

Max Dimensions:

Height: **415 mm**
Outer Diameter: **1130 mm**
Diameter central hole: **400 mm**
Weight: **51 kg** (without laser cuts)
