

TREE GRILLES: ALCORQUE CIRCULAR

| Categories: [TREE GRILLES](#), [URBAN DESIGN](#)

PRODUCT DESCRIPTION

Designer: [Bunch Design](#)

The tree grille ALCORQUE CIRCULAR is made of steel elements (50/10 thickness) and elements in exotic multi-layered wood, 30 mm thick, which are circular-shaped. The steel sheets, characterized by a particular laser-cut texture called New York, are welded together through a continuous welding, later polished. On the base of the steel and exotic wood elements there are brackets in steel sheets, 50/10 thickness, with holes 11 mm diam., for the fixing to the ground through specific bolts (not provided).

This product is entirely made in Italy from steel subjected to an electrolytic galvanising cycle and subsequently painted with PP powders with Ral colour of your choice.

As an alternative to steel EN10111DD11, the production in corten is also available, on demand. In this case the material is treated with a specific oxidation process.

The wood used is either Iroko or Okume, treated with natural, water-repellent, UV ray resistant oils.

Max Dimensions:

Height: **350 mm**
Diameter: **1000 mm**
Hole: **504x504x504**
Weight of steel: **30 kg**

Materials: [steel](#), [wood](#)
