## **PORTE-VÉLO: OMEGA-P**

| Catégories : <u>RANGE VÉLOS</u>, <u>URBAN SMART LIVING</u>

## **PRODUCT DESCRIPTION**

Designer: GIBILLERO Design

Thought as an endless loop (up and down), we realized the system Omega-P with inox steel AISI 304, or with zinc coated steel, or in corten steel 8 mm thickness and 12 cm width. This composite system is multifunction:

- it is a bollard that can also be a bike rack

- using some omega-p together can be a continuous bike rack

- putting in a small deductible bowl, it can be also used as an ashtray.

- shaping it accurately, it can also become a light bollard with the light on two different heights.

Each Omega-P element works as a single element but also as a serial element (combining with other elements and each element has its special characteristics referring to the its function).

Dimensioni massime:

short base version: overall dimensions 120 x 220 x h 840 mm  $$\rm m$$ 

Materials: stainless steel
